Women’s entrepreneurship needs to be studied separately for two main reasons. The first reason is that women’s entrepreneurship has been recognised during the last decade as an important untapped source of economic growth. Women entrepreneurs create new jobs for themselves and others and by being different also provide society with different solutions to management, organisation and business problems as well as to the exploitation of entrepreneurial opportunities. However, they still represent a minority of all entrepreneurs. Thus there exists a market failure discriminating against women’s presence. The Women’s Advancement Outcome Component (A) gauges women’s progress and degree of marginalization economically and professionally as business leaders, professionals, entrepreneurs and labor force participants. It comprises four indicators: (1) Women Business Leaders - F%T, (ii) Women Professionals & Technical Workers - F%T, (iii) Women Entrepreneurial Activity Rate - F/M, and (iv) Women Labor Force Participation - F/M.
