The relationships between music and the people who produce, perform, and use it are central to the sociology of music. This chapter introduces some of the central ideas of the sociology of music and helps you place it in the context of other approaches. Music is not just the sounds it makes. Nevertheless, it covers contemporary and historical culture from several perspectives, and embraces all types of music. It gives priority to people-centered research methods where possible, to explore music's social meanings; social networks and cultural capital; the shape of the music market; exclusivism and subcultural mentalities; and more general questions about the relationship between music and identity.
