How many Indians in poverty? Political variations. Current estimations of the number of people below the poverty line vary from 20 to 50% of the population - from conservatives' to liberals' estimations - precisely because of the debate around the Indian poverty line.

The idea is that recognizing either 240 million or 600 million poor means radically different policies for a government, so clearly the stakes are high for the parties representing richer segments of the population. Indian population in poverty. A simple first step to improve the excessively low poverty line would be for India to base it on a nutritious food security line, and then include education, sanitation, permanent homes and so forth as part of the criteria.
