Geology Underfoot Along Colorado's Front Range

By Lon Abbott & Terri Cook
Genre : United States

Release Date : 2013-10-25

Geology Underfoot Along Colorado's Front Range by Lon Abbott & Terri Cook is United States The transition from the relatively flat Great Plains to the craggy peaks of Colorado's Front Range is one of North America's most abrupt topographical contrasts. The epic, 1,800-million-year geologic story behind this amazing landscape is even more awe inspiring. In Geology Underfoot along Colorado's Front Range, the most recent addition to the Geology Underfoot series, authors (and geoscientists) Lon Abbott and Terri Cook narrate the Front Range's tale, from its humble beginnings as a flat, nondescript seafloor through several ghostly incarnations as a towering mountain range. The book's 21 chapters, or vignettes, lead you to easily accessible stops along the Front Range's highways and byways, where you'll meet the apatosaur and other dinosaurs who roamed the floodplains and beaches that once covered the Front Range; look for diamonds in rare, out-of-the-way volcanic pipes; learn how America's mountain, Pikes Peak, developed from molten magma miles below the surface only to become an important visual landmark for early Great Plains' travelers; and walk the Gangplank, a singularly important plateau for both nineteenth-century westward expansion and our understanding of the Front Range's most recent exhumation. A healthy dose of full-color illustrations and photos demystify the concepts put forth in the authors' elegant, insightful prose. With Geology Underfoot along Colorado's Front Range in hand, you'll feel like you're traveling through time as you explore the Front Range's hidden geologic treasures.

Southern California's Anaheim, Long Beach, Catalina Island, Newport Beach.
Huntington Beach, San Juan Capistrano

By: Don Young & Marjorie Young

To travel south along the coast from Greater Los Angeles is a totally different experience than the travel north from there. Certainly, the coastline is beautiful in both directions, but where the northern reaches are given to older, more self-contained communities, rapidly giving way to a totally rural environment, the southern coast is a mecca for yuppies. This is where the large shopping malls can be found, the nouvelle cuisine, the jam-packed yacht harbors, the trendy art colonies, the all-glass churches, the manicured golf courses. This, perhaps, is the stereotypical southern California, a place where young men and women wear a perpetual tan, where surfboards and swim fins are two of the most common household appliances, and where every day affords the opportunity for new adventures. This guide explores the region in depth, with an emphasis on outdoor activities, from golf and birdwatching to wine tours, watersports and hiking. We start with Anaheim, then move south to Long Beach, Whittier, Catalina Island, Costa Mesa, Laguna Beach, New Port Beach, Huntington Beach and San Juan Capistrano. Touring chapters take you to all the well-known sights, and then lead you off to unusual attractions that will amuse and delight you. Accommodation sections cover all, from camping to B&Bs to historical houses. Restaurants and cafes are chosen for their charm and impressive cuisine. Often, doing something that you've done a dozen times before, but doing it in a different place, at a different time, or with a different person can make all the difference. Under the right circumstances, even the routine can become an adventure. Everything in life is an adventure. At least, it is the first time you experience it. Every sight, every sound, every scent, every taste, every sensation is an adventure that once. Why? Because it is a discovery. And every new discovery is an adventure. So, the authors dedicate this book to discovery: to experiencing new places, new people, new activities, new sensations, but above all, to discovering new dimensions within ourselves.
