Building Better Plots

Robert Kernen

The build quality of yours needs to get better from every dot, to be able to gain the next dot. Here is the list of our build ranks on the server, the amount of dots and their colors: • - The default rank. •• - The Plot Passwords feature gives your the ability to set a password on your plot, if you want privacy. The password will be set on the plot, by the plot owner, and whoever gets on that plot will have to type the correct password.
