The Nature of Neptune. Indeed, the nature of this planet is to melt, to commune with the outer world, and to amplify the entire human emotional structure, which brings about assets such as inspiration, fertile imagination, empathy, compassion, self-sacrifice, affective intensity, and the possibility to live through dreams, spirituality, and faith. Describing the nature of astrologers and their clients, the author questions the reliability of astrological charts and forecasts and the assumptions of those who use them.
