Free shipping over $10. An historian analyzes the scope, importance, and effects of technological upheaval in America's farmland regions, using case studies to illuminate the transformation of a yeoman-farmer republic into an agro-industrial empire. A majority of the youngest Americans are already nonwhite and look less like older generations than at any point in modern American history. In California, 52 percent of all children are living in homes with at least one immigrant parent, Professor Sáenz said. Another clue that the demography is marching forward came on Thursday, when the Census Bureau released population estimates that showed, for the first time, a decline in the white population. Some experts argue that the transition to a white minority might be much further off than the numbers suggest. The Census Bureau counts any person who is of mixed race or ethnicity as nonwhite, and experts say this can underestimate whites in the population.
