I. The Myth that state and local governments debt is just as volatile and prone to default as U.S. corporate debt or the debt of other sovereigns.

II. The Reality that state and local governments in the U.S.A. have a long, proud history of doing whatever it takes to pay their debt obligations and have a significantly lower default rate and higher recovery rate than U.S. corporate debt or the debt of other countries.

III. The Reality that in keeping with historical precedent, state and local government defaults went down in the last half of 2010 and first half of 2011.
