A design with poor alignment is a little like a poorly organized desk. is a more organized and symmetrical look than placing text haphazardly. Center alignment works best when dealing with just a few short lines Like with center alignment, you should avoid using flush right on. Logo Design Tips 3.
The modern-day suit of armor: Tailor creates bullet-proof outfit for 'businessmen who live dangerous lives'. Made-to-order bulletproof suits launched at a gun range today by Canadian tailor shop Garrison Bespoke, complete with open-ammo demonstration. The suit is made with a special military-grade material that is 30 times stronger than steel and 50 per cent lighter than Kevlar, the product most commonly used in bulletproof wares. Stealthy chic: A marksman opens fire at a bulletproof suit created by Canadian label Garrison Bespoke at a gun range in Ontario today. The suit, lined with ultra thin sheets of carbon nano-tube technology, starts at $20,000. But when it comes to logos and other written digital and print marketing materials, there's a lot of confusion about typefaces, fonts, and the law. You can face heavy fines and get into a lot of trouble if you don't have a license to the fonts and typefaces you use. Crowdspring has helped tens of thousands of the world's best entrepreneurs and small businesses with logo design (and other design and naming services). We know a little bit about fonts, typefaces, logos and the law. Whether you're a business owner or designer: if you want to avoid running into legal problems with your logo, this video is for you. I talk about typefaces, fonts and the law. You won't be an expert, but you will know enough to ask the right questions.
