Technically, historical archaeology is the archaeological study of people who left a written record in addition to a physical, or artifactual, one. In the United States, however, the term is understood to mean the archaeology of all people after European contact. Different regions of the country were settled by non-natives at different times. On the East Coast, historical archaeology begins in the late fifteenth or early sixteenth century and continues to the present. Remember that historical archaeology delineates a period of time after an event (European contact) rather than a group of people.
