Eilan
Psychoanalytic psychology, or psychoanalysis, is the direction by which mental processes are determined by the unconscious, and mostly of a sexual nature. It was developed by Sigmund Freud, was repeatedly specified by him, and in the most complete form was set forth in the "Essay of Psychoanalysis". The main concept of psychoanalysis is not the conscious, but the unconscious.Experts in the philosophy of science, as a rule, refuse to recognize the scientific status of psychoanalysis. The positions of the critical rationalist K. Popper and the analytical philosopher A. Grünbaum are indicative in this respect. K. Popper attributed psychoanalysis to pseudoscientific theories insofar as it is not falsified.
