Although men and women vote at similar rates today, women still trail men in important participatory attitudes and activities such as political interest and discussion. Inequalities in political involvement undermine the quality of deliberation, representation, and legitimacy in the democratic process. A confluence of several interrelated factors (resources, economy, socialization, political context) work together to account for these differences. Today, scholars more carefully consider the socially constructed nature of gender and the ways in which it interacts with other identities. Recent Political Socialization. Political socialization is a lifelong process by which people form their ideas about politics and acquire political values. The family, educational system, peer groups, and the mass media all play a role. While family and school are important early in life, what our peers think and what we read in the newspaper and see on television have more influence on our political attitudes as adults. Family. The family may be losing its power as an agent of socialization, however, as institutions take over more of child care and parents perform less of it. Schools. Children are introduced to elections and voting when they choose class officers, and the more sophisticated elections in high school and college teach the rudiments of campaigning.
