Tyne and Wear Archives, Blandford House, Blandford Square, Newcastle Upon Tyne, NE1 4JA: RTC North Ltd, business support organisation, Sunderland: reports relating to north east regeneration 1994-2007 (DT.RTC)

Led in by Mike Ellis’ trademark enjoyably informal, conversational style, this book adopts a slightly more formal voice in subsequent chapters, but is highly readable throughout. Early in the first chapter the author provides a helpful clarification of ‘What this book is not’. It does not provide detailed practical guides to specific technical topics such as Cascading Style Sheets or improving search engine rankings, since these are widely available online and in any case change rapidly. Such knowledge, the author suggests, is best developed through conversations with others working in this and related fields. And this helpful tip is typical of the advice on offer in this book, which is based on many years’ experience as a web master in the cultural sector, and is focused on helping the reader develop their own strategic approach, partly though ‘providing some insight into the day-to-day activity of keeping your sites up and running with fresh content as well as the longer term horizon of growing as your content, visitors and working environment changes.’ Another aspect of the book’s approach is summarised thus: ‘One of the key themes running through this book is the examination of the means by which you – as website manager, owner of website or interested staff member – can move yourself into a position in which you become more empowered.’

Following the introduction, Chapter 1 ‘Evaluating what you have now’ invites the reader to do some top level thinking about their current situation, mindful of the fact that ‘The role of institutions on the web changes constantly’, which is one of the reasons why the self-reflective approach encouraged in the book is so important. Good use is made of references to Pew Internet research, The Gartner Hype Cycle and the ‘long tail’ to get across the need for continuous review and reassessment of objectives and approaches. The approach to taking stock advocated in this chapter includes assessment of the organisation, the web team, stakeholders, current content generation systems, metrics and a technology audit.

Chapter 2 offers some ‘ways that you can start to put your site into some kind of wider context. This chapter looks at some techniques to help you take charge of your site and begin to step outside of the reactive mode that often overcomes many website owners.’ Topics such as ‘What should a strategy cover?’, how to structure it and then how to ‘evolve your strategy’ are covered, with such practical advice as who should sit on the web strategy team and the need for regular strategy reviews. The third chapter on ‘Content’ deals with the use of web content management systems (WCMS) and how they can help with the challenge of keeping content fresh and up to date. It also looks at ‘what it means to have content outside your site, and how this makes your website into a web presence.’ The importance of dealing with off-website web content is explored further later in the volume.

Would that more organisations would heed the advice implicit in this statement: ‘It is an unfortunate fact that many WCMS systems are procured by technical people – unfortunate not because technical people are deficient in any way, but because it is very likely that your content is actually going to be provided and edited by non-technical people.’ The next chapter on ‘Marketing’ covers search engine optimisation to improve visibility, as well as offline marketing and online marketing. It is backed up by useful
Bernanke (2010) states that commercial banks and thrift institutions had been exposed to runs prior to the creation of deposit insurance. Solow (2013) states Obviously, given these protections, there will be no runs on banks. City reported that deposits declined particularly in business transaction accounts and other accounts in excess of the FDIC insurance limit. The Boston Globe also reported withdrawals by businesses at Sovereign, confirmed by an SEC filing. The short-lived outflows at Citigroup. The first line in Table 4 is from May 1933, and records the concentration of deposits in accounts over $50,000—well above the $2,500 insurance limit that went into effect in January 1934 and the $5,000 limit in place from late 1934 until 1950.
