Philosophical coaching is connected with modern science in asking fundamental questions about the nature of what we know or seem to know. Philosophical coaching is the butter and bread of freedom of thought prompted renewal of debate about moral and ethical enquiries. The objective is to help us evolve to heightened state of consciousness, to free us from the common life and tyranny of routine in an attempt to live a richer and blessed life. In the seventeenth century it gave birth to natural science, in the eighteenth century to psychology, and in the nineteenth century to sociology and linguistics. During the twentieth century philosophy has played a prominent part in the development of computer science, cognitive science, and research into artificial intelligence.

† Special issue of APA's Journal of Theoretical and Philosophical Psychology, Vol. 35, No. 2, May 2015. The purpose of the four position papers and the three commentaries on them is to discuss some relatively undeveloped historical, philosophical, and social contextual issues that the authors discern in the APA and Canadian Psychological Association codes of ethics. Psychology and Social Justice. Special issue of APA's Journal of Theoretical and Philosophical Psychology, Vol. 34, No. 1, February 2014. The specialty of Theoretical and Philosophical Psychology offers an open-access forum for theoretical perspectives that give insights into the nature of mind, brain and behavior. The approach is highly interdisciplinary; contributions at the bridge between philosophy and psychology are encouraged. Contributions might be theoretical and experimental, provided that they have important theoretical implications. Experimental articles can make use of any available scientific method, including naturalistic observations, qualitative methods, laboratory experiments, clinical interviews, case studies,
