In studies of gender and sports, the concept of gender is analytically distinguished from that of sex even though the two are often used synonymously in everyday language and thought. Not all the differences between females and males are biological. But historically, the first attempts to analyze women’s place in sport were made in the 1960s by physical educators. The result was a corpus of largely atheoretical work on women in sport founded upon a liberal feminist consciousness about sport as a male preserve characterized by gender inequities.
