Part Two – Anthropological and Ethical Aspects that require theological, anthropological, psychological and ethical considerations, which is the first major triumph of gene therapy in the field of organ transplantation an ethical assessment on the practice of xenotransplantation, we do well to consider
Ethical practices in psychology have changed over time. In 1947, at the end of the Second World War, research ethics principles for human experimentation known as the Nuremberg Code were set as a result of human experiments in concentration camps. Combined with the Declaration of Geneva (1948), these principles became the Declaration of Helsinki, the current cornerstone document on human research ethics. Today, ethical guidelines are published by the British Psychological Society in the United Kingdom and the American Psychological Association in the United States. The purpose of these represe Cross-cultural psychology emerged in the late 1960s as a self-conscious discipline, separate from both anthropology and psychology yet closely linked to both. A major turning point was the Ibadan conference, during the Christmas-New Year vacation of 1966 and 1967, at a time when the Zeitgeist was ready for the emergence of a separate field. An issue then is how should the educational systems be constituted to accommodate the diverse cultural elements. Applications of cross-cultural psychology have included work on cross-cultural training and handbooks on that topic: work on culture psychopathology as well as counseling, and the influence of culture on organizational behavior. Graduate Training in Cross-Cultural Psychology.
